EXPARTE QUALYE

1. This application is in condition for allowance except for the following formal matters:

Applicant needs to cancel claims (claims 1-15 and 21-23)directed to the non-elected subject matter.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

RESPONSE TO APPLICANT'S ARGUMENTS

2. The Examiner acknowledges Applicant's request for reconsideration filed 10/19/06.

Note: Claims 1-23 are pending.

Double Patenting Rejection

The double patenting rejection is WITHDRAWN.

Restriction Requirement

It is duly noted that Applicant maintains the traversal of the restriction requirement for reasons of record in their response filed 1/24/06 and has requested that the Examiner once again reconsider the restriction requirement.

Art Unit: 1618

Applicant's request for reconsideration based on the response submitted 1/24/06 have been reviewed again and found once again non-persuasive.

First, a method of transplanting an organ is of a different scope than a method of performing angioplasty, a method of treating naturally arising cancer, and a method of reducing inflammation. As a result, prior art which is applied against one method would neither anticipate nor render obvious one of the other method. Also, it is noted that the term 'inflammation' defined using any standard medical dictionary (i.e., The Harper Collins Illustrated Medical Dictionary, page 221) is a tissue reaction to irritation, infection, or injury, marked by localized heat, swelling, redness, pain, and sometimes loss of function. Furthermore, the phrase 'inflammation' encompasses a wide range of conditions associated with asthma, adult respirator distress syndrome, interstitial pulmonary fibrosis, pulmonary emboli, chronic obstructive pulmonary emboli, chronic obstructive pulmonary disease, primary pulmonary hypertension, chronic pulmonary emphysema, congestive heart failure, peripheral vascular disease, stroke, atherosclerosis, ischemic reperfusion injury, heart attack, glomerulonephritis, conditions involving inflammation of the kidney, infection of the genitourinary tract, viral hepatitis, toxic hepatitis, cirrhosis, ileus, necrotizing enterocolitis, specific and non-specific inflammatory bowel disease, rheumatoid arthritis, cancer, wounds, Alzheimer's disease, Parkinson's disease, graft versus host disease, and hemorrhagic septic, or anaphylactic shock (see claim 13 in the instant invention). Hence, it is the Examiner's position that the inventions are distinct and would require separate search and consideration. Thus, the restriction requirement is still deemed proper.

WITHDRAWN CLAIMS

3. Claims 1-15 and 21-23 are withdrawn from further consideration by the Examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

ALLOWABLE CLAIMS

4. Claims 16-20 are allowable over the prior art of record. In particular, the claims are distinguished over the prior art of record for reasons of record in the office action mailed 4/19/06.

Note: It should be noted that the full scope of claims 16-20 have been searched.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. L. Jones whose telephone number is (571) 272-0617. The examiner can normally be reached on Mon.-Fri., 6:45 a.m. - 3:15 p.m..
